

**Transpharmation** is a **contract research organisation** led by scientists. Recognised by drug developers worldwide for researching and delivering life-changing medicines, science will always remain our passion. We specialise in cross-species and cross-therapeutic areas in translational pharmacology with **AAALAC** accreditation. Our breadth of neuroscience expertise means clients are able to benchmark their compounds against clinical gold standards in well validated behavioural and molecular assays and includes **PK & non-GLP safety, Pain, Epilepsy, Depression & Anxiety, EEG, Aging, Neurodegenerative Disorders, Biomarkers, Cognitive Disorders and more...**

We are committed to on-time data delivery and flexibility whether for gold standard models to innovative customized platforms, our research services deliver the critical pieces of information needed to realize the full potential of your preclinical assets.
